

# EmuRA Rubber

Emulsion, release agent designed for the production of concrete elements in rubber molds. It does not contain volatile substances. It does not damage /change the parameters of rubber molds. Non-flammable, odorless agent. Very high biodegradability.

## Directions for use:

- rubber molds - apply thinly with a high-pressure sprayer, do not rub. If necessary, in case of too excessive application of the agent, rub the applied product after 15 minutes

\* the mold is ready for filling when the white dots disappear. It is best to apply with a so-called round steel nozzle 0.05.
