

# EmuRA Uniwersal

Emulsion, release agent designed for the production of concrete elements of the type; filigree ceilings etc. Does not contain volatile substances. Contains corrosion inhibitors. Non-flammable, odorless agent. Very high biodegradability.

Directions for use:

- metal parts - apply thinly with a high-pressure sprayer, do not rub. If necessary, with too excessive application of the agent, rub the applied product after 15 minutes.
  - plywood mould - apply thinly with a high-pressure sprayer - for a better effect / aesthetic appearance of the finished concrete element, the agent can be evenly rubbed on the mold using a clean cotton cloth / cleaning cloth.
- \* the mold is ready to be filled with concrete immediately after the white dots disappear.
- \* reinforcement of the mold can take place ad hoc after the application of the release agent.

Use a 0.06 steel nozzle for application (0.05 for small complicated shapes)
